
HAY DJAMPA

SEVERAL OBJECTIVES – ONE APPROACH

CHILDREN OF ARMENIA

THE ARMENIANS THROUGHOUT THE WORLD

- Armenia as recognized by the Treaty of Sèvres is composed of four parts, the occupied Western Armenia, the Republic of Armenia, the Republic of Artsakh and the Dzhavakhk.
- From 1894 to 1923, the Armenians from Western Armenia have undergone a genocide ; out of 2.1 millions Armenians in Western Armenia, about 240,000 could reach the present Eastern Armenia and Dzhavakhk, about 500,000 had to exile themselves throughout the world.
- Their number is today estimated to more than seven millions, 70 % of which are living outside the Republic of Armenia.
- In 1988, an earthquake in the Republic of Armenia made almost 20,000 victims and thousands of homeless.
- In 1988, the neighbouring Azerbaijan launched an attack against the Armenian population of Baku, Soumgaït, Kirovabad and of the whole Artsakh, resulting in 15,000 victims and thousands of Armenians compelled to exile themselves, still undergoing war blackmail.
- Now, the Dzhavakhk region, an historically Armenian province, undergoes intensive pressure from Georgia.

WHAT AND HOW ?

The objective of Hay Djampa is to achieve an extensive programme of childhood protection and to promote the development of the disaster victims.

It is defined by :

A spirit :

- Drawing up collectively an action programme justified by precise needs, using the expertise of every team member, in partnership with a local association
- Reporting and publicizing the progress of our projects.

A behaviour :

- Organizing work teams in order to help directly the local populations in carrying out the projects.

THE ACTION

HAY DJAMPA operates in 4 major fields :

Emergency action

During the last decades, after the earthquake and the war, field hospitals received hundreds of injured and shell-shocked people everyday.

Hay Djampa made every effort to help the victims of natural disasters and war, by providing the medical structures with emergency medications.

Training, Education and Sport

As from 1989, hundreds of children and teens could benefit by free training, through athletic or cultural activities in schools and other adequate structures.

Health

As from 1991, medical structures such as hospitals, community clinics or health centres could operate thanks to a permanent supply of first-aid products and equipment and to the assistance of doctors for training and medical care management.

Housing and Nutrition

Since 1994, Hay Djampa has been carrying out rehabilitation programmes in Upper-Karabagh (Artsakh) villages, including farming activities intended for local populations, the programme is called "OJANTAG".

WHICH OBJECTIVES FOR TOMORROW ?

To summarize, here are the main objectives adopted by the Armenian National Council, of which Hay Djampa takes note :

- Improving the precarious condition of the families living in the most distant areas of Djavakhhk and Artsakh ;
- Implementing training structures accessible to everyone ;
- Protecting the health of children and continuing the struggle against malnutrition ;
- Enabling everyone to discover and appreciate differently Djavakhhk and Artsakh regions by creating links with the outside world ;

Thanks to its partners and members, Hay Djampa is a dynamic element in the process of sustainable development of the Armenians.
